

General Tire

Logo Guidelines

Logo Usage Introduction

The goal of these guidelines is to ensure that the logo is always as clean and clearly visible as possible. This means using the appropriate logo for each practical application.

For more information on the Logo Guidelines, please contact Sean-Paul Brown at sean-paul.brown@conti-na.com or +1 (704) 583-8946.

Logo Versions

STACKED APPLICATION

This logo is the primary logo and, space permitting, should be used on all communication.

HORIZONTAL APPLICATION

This logo is permitted in all communication where there is insufficient space for the vertical application.

SHIELD ONLY

Please refer to page 9 for approved usage.

(Alternate Use)

Color Applications

RED

Use in all practical applications where the background is mostly white / light.

WHITE

Use in all practical applications where the background is mostly black / dark.

BLACK

Use in all single color applications where red cannot be used and the background is mostly white / light.

WHITE OUTLINE

Use in all practical applications where the background is busy and RED logo is still preferred.

Protection Area - Stacked

Stacked Logo
without URL

Stacked Logo
with URL

NOTES

The logo must always be surrounded by a uniform protection area that is 20% of the logo width. The protection area defines the minimum margin between the logo and all other design elements.

The logo may be used in combination with the website URL in UPPERCASE letters in black:

WWW.GENERALTIRE.COM

Protection Area - Horizontal

Horizontal Logo
without URL

Horizontal Logo
with URL

NOTES

The logo must always be surrounded by a uniform protection area that is 10% of the logo width. The protection area defines the minimum margin between the logo and all other design elements.

The logo may be used in combination with the website URL in UPPERCASE letters in black:

WWW.GENERALTIRE.COM

Shield Only - Approved Usage

Product
Branding /
Sidewall

NOTES

It is acceptable to use the Shield in isolation from the General Tire Logo only if the General Tire logo is visible in the same medium and/or in the same setting as shown in the examples below:

(1) The shield may be used for product branding on the sidewall of the tires.

(2) The shield may be used in executions only where the full General Tire logo with lettering is already in use on the same layout.

Multi-branded
Use

Logo - Don'ts

DO NOT SQUISH

Never squish the logo vertically or horizontally to conform to a layout. Always change the size of the logo while conforming to its ratio.

DO NOT CHANGE COLORS

Never use colors outside of what is stipulated in the guidelines, regardless of the application. If you are forced to use a logo that cannot be in color, always default to black or white.

DO NOT DISTORT

Never warp or distort the shape of the logo.

DO NOT OMIT

Never omit parts of the logo or separate the logo wording.

DO NOT BUNCH

Never bunch other graphic elements up against the logo. Always adhere to the protection area guidelines.

DO NOT ALTER

Never change the proportions of the logo or alter its components in any way.
