## CrossContact™ LX - Highway & Street Tire

**The well-balanced tire for medium-weight to heavy 4x4 vehicles.**

Thanks to the open outer shoulder, this tire provides good handling and braking properties even on easy terrain. The four deep and broad circumferential grooves widen towards the opening, ensuring very good aquaplaning resistance and reducing tire damage by hindering stones from getting caught. Thanks to their rib characteristic and pronounced siping, the three circumferential block rows make for precise steering response and very good straightline performance while guaranteeing that the tire rolls very smoothly and quietly.
